

Table 1: 3PC (correct): pruning ratio (baseline/timed #execs) over the $L/U \times W/U$ grid, $sd/U = 0$.

$L/U \setminus W/U$	2	3	5	7	10
0	11.92	17.77	17.93	17.93	17.93
0.25	13.51	17.93	17.93	17.93	17.93
0.5	14.90	20.26	20.26	20.26	20.26
0.9	14.90	20.26	20.26	20.26	20.26

Table 2: 3PC (correct): timed #execs over the $L/U \times W/U$ grid, $sd/U = 0$, $N = 3$ (lower = more pruning).

$L/U \setminus W/U$	2	3	5	7	10
0	170	114	113	113	113
0.25	150	113	113	113	113
0.5	136	100	100	100	100
0.9	136	100	100	100	100
